-------------------	---

08/2020 - 12/2020

Secondary Education in India

The project aims to collect data on few essential variables (such as enrollment ratio, teacher student ratio, availability of teachers, scholarship schemes and so) from various departments administering secondary education in India. The thrust of the project is on methods of collecting data from government departments as many a times information may not be available on the website. This project exposes the challenges of data collection from government departments and helps to make effective use of instruments such as RTIs to get information.

02/2020 - 06/2020

Highland Highways: Four Lane project and it's impact on the roadside settlements in Himachal Pradesh

Considering the importance as well as hazards of road construction in the Himalayan region this study tried to understand the four lane construction project underway in Himachal Pradesh. It tried to understand and unearth the impact of such projects on the roadside settlements, it's economy as well as the everyday realities of life.
