

LITTLE GENIE

1 Year Online Classroom Programme for KG

Mathematics - Scientific Awareness

General Awareness - English - Malayalam - Art

About Us

In this highly competitive world, where some students require Individual Care and attention in order to be nurtured into a valuable member of the community. We, as a team, recognise that there are differences in learning speed among students which have no place in a classroom setting. Team **INTERVAL** provides personalized online and home tuition for K-12 students with one to one individual care and attention towards the progress of student and mould them to develop their imaginative and innovative skills.

INTERVAL is an institution which focuses on the development and all-round progress of the individual, at **INTERVAL** we believe in guiding individuals who lack the basic reading and writing skills and also those who require personal assistance to be more competitive. Our syllabus is designed according to the needs and the capabilities of each individual that we help, in their journey towards educational excellence. Our custom made syllabuses are crafted after thorough research in the fields of pedagogy, psychology. our classes are conducted by experienced trainers with diverse background. Trainers undergo constant knowledge enrichment programs at a regular interval in order to include the latest developments

What is LITTLE GENIE ?

Preschool groom young minds and contribute to the development of children. Early education is a very crucial point. That is why we are here to provide the best education available for your little ones. **INTERVAL** has sworn on to create a change and give the students a break from the monotonous spoon-feeding education system.

So, we at **INTERVAL** have come up with the ultimate KG programme- **LITTLE GENIE**. We are here to provide the most joyous and amazing time for young minds. This is a one-year online classroom programme carefully researched and put together to bring out the best in your child. Our curriculum is flexible and personalised which takes into account the heterogeneity of the learner and learning styles. Our interest is in nurturing linguistic and logical reasoning ability through adopting an innovative method to stimulate interest and attention in the child. We provide a strong foundation for all-around development and life-long learning.

The course includes both Scientific and General Awareness lessons along with subjects like Maths, English, Malayalam and Arts. We provide customised worksheets and textbooks free of cost to ensure that the course will open up pathways to holistic and harmonious development in young learners.

Features

One to One Attention

One-to-one sessions ensures the students interacts with the teacher individually, so that each can learn and understand concepts at their own pace and in their own way and identify their full potential.

Modern Curriculum

The modern curriculum apart from subject or content- knowledge gives importance to provide practical experiences and knowledge to kids based on Psychology of Individual Differences through a conducive learning environment.

Value Based Education

Value Education means teaching and learning of ideals. The aim is for students to understand moral values and show their good behavior and attitude towards society. It helps the students to develop the character and improves the inner and outer personality of the student.

Assessment and Evaluation

Well-designed assessment can encourage active learning especially when the assessment delivery is innovative and engaging. Proper tests and evaluation can benefit the student as curriculum and pace of teaching is customized as per the results.

Worksheets and Textbooks

We provide textbook series with a balanced, chronological presentation of informations according to the modern curriculums. Our Worksheets are more participative and mind provoking than any other mode of imparting education which makes them more creative.
